7. Install energy-efficient windows. **Save \$160** with double-paned windows; qualify for rebate.
8. Choose an energy-efficient heat pump. **Save \$235** with one with a SEER 15 rating; qualify for rebate.
9. Fix leaky ducts. **Save \$280**; schedule a DUCT CHECK and get a \$150 rebate toward the repair.
10. Install reflective roof. **Save \$280** by installing an Energy Star roof; qualify for rebate.

## Compact Fluorescent Bulbs (CFLs)

They cost more than traditional light bulbs, last 10 times longer and use 75% less energy to operate. Replace the bulbs in your five most-used fixtures and save about \$50 per year on your energy bills!

### Use:

- **30-watt outdoor quality CFL:** in attic
- **23-26-watt outdoor flood:** outside house
- **23-26-watt CFL:** indoor bedroom or office
- **15-20-watt CFL:** bathroom
- **20-watt CFL:** kitchen
- **13-15-watt CFL:** living room

# CAPTURE THE POWER OF THE SUN: SunSense<sup>SM</sup>

Get a \$450 rebate when you invest in a new solar water heater and participate in Progress Energy's EnergyWise program.

A solar water heating system should save between **50-85%** of the hot water portion of the monthly utility bill, or **\$200-300** per year for a family of four, if backup element is kept at 122 degrees F. – Florida Solar Energy Center

Reducing your electricity demand will save more than 40,000 pounds of harmful CO2 emissions over 20 years.

## Savings from Installing a New Solar Water Heater

1. \$450 upfront rebate from Progress Energy and up to \$60 in EnergyWise credits every year
2. Federal tax credits up to 30%
3. Savings up to 85% on your water heating costs
