

# SciCafé

ST. PETERSBURG '10

PRESENTED BY  
**THE PIER  
AQUARIUM**  
*Community Marine Education*

## *Building on the Scale of Molecules*

**USF**  
UNIVERSITY OF  
SOUTH FLORIDA  
COLLEGE OF MARINE SCIENCE

 **ACS**  
Chemistry for Life™

  
**AMERICAN  
MOMENTUM BANK**  
BUILDING FLORIDA'S BANK™

**NOVA**  
scienceNOW

  
**RED MESA  
CANTINA**

**TOPIC: Nanotechnology: From Port Security to Sunscreen**

**When: 6-7:30pm Tuesday, Jan. 19**

**Where: Red Mesa Cantina, the Courtyard  
128 Third St. S  
St. Petersburg**

### **Free food and drink specials**

SciCafé St. Petersburg '10 is your chance to join the discussion about science! It'll be casual; no need to read up on the topic, no tests. Just don't be late!

Our first conversation of the year will explore Nanotechnology. In the traditional sense, nanotechnology means building things from the bottom up with atomic precision.

This SciCafé won't be going "sci-fi" on you, although we will be talking about a very powerful 30-year technology that, in the years ahead, will continue to change our lives.

Our speakers for this conversation:

John Bumgarner, PhD  
Director, Microscience Engineering Laboratories,  
SRI International

Priscila Spagnol, PhD  
Sr. Research Scientist, SRI International

Roxanne Ebert  
Formulation Scientist, Dermazone Solutions
